Greenfields University

Marine Biology

Did you know that almost 95% of the sea remains unexplored? In this course we will explore Life under the water and investigate the different type of creatures we might find in our seas and oceans. We will also look at what we can do to look after our oceans and protect the animals that live there.

Greenfields University

Energy Mastermind

To become an energy mastermind, you must know your renewable energy - an ever increasingly important aspect of our lives today. In this course, you will find out about all of the different renewable energies and try to design your own version of these.

The future is green! The future is sustainable! The future is renewable energy!

Greenfields University

Underwater Mosaics

Would you like to learn about how waste and rubbish is having an impact on life in the sea and create artwork to make people aware of this? In this course we will make mosaics to show effect that humans are having on the oceans and we will explore ways that we can do our bit to prevent it.

Greenfields University

Young Eco-inventors

Are you creative? Do you see yourself as an inventor? Do you want to look after the environment? If your answer to these questions is yes, then this is the course for you. In 'young inventors' we will design and create inventions that will help and improve our environment, making our world a better place to live.

Greenfields University

Clean water

Have you ever wondered where your clean water comes from? In this course we will be learning how to filter dirty water to make it clean. Over the weeks we will look at the importance of clean water and the different methods used to filter it. We will even have a go at making our own water filters.

Greenfields University

Life below water

Let's make an impressive Underwater Display and include messages of how we can help preserve it for the future. Join us to make this underwater scene from drawings, collage and paint.

Greenfields University

Recycled Art KS1 & KS2

Would you like to make a bird feeder from an empty juice carton? Would you like to make portraits from old newspapers? Would you like to make a game from empty drinks bottles? Then come along to the Recycling Art course.

Greenfields University

Marine animal safety

Marine creatures all over the world are living with plastic rubbish. We can help them but how? On this course you will discover which animals are in danger and how we are making the seas and beaches a dangerous place to live. We will find out how we can help and then we are going to create posters which inform others and persuade them to protect these creatures and keep our waters clean.
